In this research, we explore the role of the housing function in the residential mobility of tenants in Switzerland to rethink the concept of flexibility in architecture and overcome the building’s social and material obsolescence.

**HYPOTHESES - MATERIALS - METHODS**

**Housing functions and satisfaction**

- **Independent variables**
  - **Satisfaction with dwelling**
  - **Level of satisfaction of tenants with current dwelling**

- **Dependent variables**
  - **Match between current and ideal housing function**

**Housing functions and triggers**

- **Factors**
  - **Function change**
  - **Change between present and past housing function**

**Housing functions and characteristics**

- **Variable names**
  - **Function Importance of the ideal function (regression)**
  - **Function Importance of the ideal function (SD)**
